3 Does your doctor use the latest technology and treatment?

Our experienced and best-trained physicians are pioneers in minimal, non-invasive, no visible scar surgical techniques for correction of bunions, hammertoes, and other foot deformities. This technique utilizes 1-2mm incisions, similar to the one used in Arthroscopy. We constantly undergoing training and lectures to stay on top of the newest trends in podiatry, our office offer the best technology for their patients like:

Diagnostic ultrasound, PRP Injections, Minimal invasive surgeries, Digital X-ray, Digital Orthotic Scanner, Homeopathic Injections, Laser for fungal toenails

We want to make sure we provide our patients with best care as compared to others.

5 Do they recommend treatment besides surgery?

We are pioneers in non-invasive techniques for Bunions, Hammertoe. We treat Arthritis and injuries like Sprains, Plantar Fasciitis, Tendinitis and Neuroma utilizing contemporary FDA approved techniques like an injection of your own processed blood plasma PRP to the area of need in your body, custom braces, bio-puncture therapy, physical therapy and more. We provide a variety of homeopathic treatment for muscular skeletal problems in form of injections, pills, creams, and gels as an alternative option to conventional steroidal injections, pills and unnecessary in most cases surgeries. We use advanced and innovative European neurotic dehydrated alcohol injections to shrink Neuromas and provide long-term, non-surgical solutions wherever possible. The same injections also work for many types of neuritis such as burning pain in toes, heels, or around joints.
